Personal statement

I recently gained a diploma in software development through the Code Institute whilst working full time as an Assistant Manager. I decided to enrol myself onto the "Full Stack Web Developer" course to help with my career change. The reason I did this was to help me pursue my interest in web design and web development along with marrying my newly acquired skill set with my other passion of photography.

I would now like to utilise the skills and experience gained from my years in retail management and undertake a new challenge in the world of web design and development.

Key Skills

- HTML5, CSS, JavaScript and Python coding languages.
- Familiar with developer's frame works such as Bootstrap, jQuery, Flask and Django.
- Excellent management and team development skills.
- Extensive experience in managing 6-figure yearly employment budget.
- Strong P&L management skills allowing the business to maximise profits.
- Advanced in developing and executing business plans.
- Photography.

Employment History
